BHP Billiton Petroleum's Internship Program:

Each summer BHP Billiton Petroleum offers students the opportunity to explore career opportunities in the Petroleum industry while learning more about BHP Billiton Petroleum's culture, employees and leaders. During the 12-week program, students are involved in a challenging assignment that builds on concepts and skills acquired through their coursework. Our summer program spans from mid-May to the beginning of August and is filled with networking and professional development to assist students with building a foundation. Our program focuses on:

- A challenging assignment with a set of attainable expectations and deliverables
- Supervisor, team and mentor support and feedback on work-related matters
- An assigned buddy (peer level) to assist you with information about the company and things to do around Houston
- Lunch and learn with senior management to learn about BHP Billiton Petroleum, career progression and leadership
- Professional development workshops
- Team building and social events with other interns, grads, managers and buddies
- Participation in community service activity
- Final presentation to managers and peers showcasing your internship assignment

Interested in joining us this summer? Apply through your career center for our rewarding, challenging and fun-filled internship program!

Exactly where I want to be.

A new job is exciting! It's a new chapter in your life. As you begin that chapter, BHP Billiton Petroleum is exactly where you want to be.

At BHP Billiton Petroleum we provide a fast-paced and innovative environment with challenging work and supportive teams to accomplish business objectives while actively guiding and supporting your professional growth. When you join our team, you will be part of one of the largest independent oil and gas companies in the world with motivated and driven employees like you. Your hands-on training begins day one and your experience will be challenging and rewarding. Our organization achieves greatness by having the right people in the right positions.

At BHP Billiton Petroleum we don't just explore the world for oil; we look for opportunities to make a difference too. Our charter value of sustainability reflects our commitment to health, safety and welfare of our employees, being environmentally responsible and supporting our communities. We are one of the safest oil & gas companies in the industry and are committed to making a positive difference in the communities we operate. When you join our team, you will be a big part of our commitment to Zero Harm.

BHP Billiton Petroleum has the resources, technology and capital to provide a path to success. Our strong financial platform allows us to take a long term approach as we focus on the principles of Opportunity, Growth, Exploration and Discovery. This reflects not only who we are, but what is important to us and where we are making the biggest impact in the energy industry.

We're looking for the brightest and most ambitious people to join our team so come explore with us!

BHP Billiton Petroleum's Graduate Program: Geosciences

Our Graduate Program has been specifically designed to address the unique career development needs associated with Geosciences. Highlights of the two-year program include:

- Immediate application of your geoscience skills to solve real problems and contribute to our business
- Rotations through several job assignments within the same discipline to build a solid foundation to your career
- A custom development plan, created by you and your supervisor, to meet your specific technical development needs
- A formal mentorship program where you will be assigned a mentor to focus on your development and help guide you through the program
- Two weeks of training dedicated to developing important soft skills
- Graduate-hosted meetings covering a variety of technical topics
- Additional opportunities to learn presentation skills, effective communication and influencing methods, as well as an oil and gas overview course
- Social events with other program participants give you an opportunity to connect outside of the office

Discipline areas within onshore and offshore that graduates are recruited for include:

- Exploration
- Development
- Production
- Operations

So, what are the requirements? If you will be graduating with a Master's or Doctorate degree in geosciences or geophysics, with a GPA of 3.25/4.00, and have participated in an internship or related experience, we encourage you to apply.

BHP Billiton Petroleum's Graduate Program provides the career opportunity, professional development, and challenge that make it exactly where you want to be!
